Federal money for FNQ landcare

FOUR Far North Queensland organisations will receive funding to continue preserving the environment under the federal government's National Landcare Program.

Federal Leichhardt MP Warren Entsch said the grant recipients were leaders in environmental management and conservation. They include Cairns Aquarium and Reef Research Centre, Mossman Botanic Garden, Wuthathi Aboriginal Corp and the Saltwater Creek Erosion Control and Revegetation Project.

"I am proud to congratulate the four organisations who will receive \$50,000 in federal funding to deliver resource management activities that will improve the quality of our local environment," he said.
